TREE OF LIFE / ÁRBOL DE LA VIDA

The Cocos nucifera, better known as the coconut palm, is called the “**Tree of Life**” because all the parts of the entire tree—from top to bottom—are used to sustain human life. This is due to its remarkable ability to provide a variety of essential resources, from nutritious coconuts to leaves and trunks used for construction, and the coconut shell, which can be utilized for cultivation purposes as a **versatile resource supporting life’s sustenance**.

*El Cocos nucifera, más conocido como cocotero, es llamado el “**Árbol de la Vida**” porque todas las partes del árbol completo, desde la copa hasta la base, se utilizan para sostener la vida humana. Esto se debe a su notable capacidad para proporcionar una variedad de recursos esenciales, desde cocos nutritivos hasta hojas y troncos utilizados para la construcción, y la cáscara de coco, que puede ser utilizada para fines de cultivo como **un recurso versátil que sostiene el sustento de la vida**.*
